Work safely on the truck cabin TÜV approved

CR truck scaffolds are a cunning solution for work on the truck cabin. The aluminium truck scaffold provides safe and ergonomic access to the cabin at two levels: both at the front and the back.

A lucrative alternative for the professional Custers Handy truck scaffold. This truck scaffold also has rubber protection strips and working heights of 3.5 and 4.7m, but is mainly composed out of standard CR scaffold components.

Specifications

- Working height of 3.5m and 4.7m
- Length: 4.06m
- Width: 2.49m
- Made in The Netherlands
