## Be in control of wind and weather! Ultimate weather protection

A simple and universal roofing system fitting Custers Mobile Towers and other brands with comparable tube dimension.

It is recommended to anchor the scaffolding before using this kind of weather protection.

The tarpaulin offers weather protection on the long side of the scaffold. The infinitely variable roofing frames with the flame resistant polyethylene tarpaulin can be positioned optimally for a dry and well protected working position.

### Specifications

- Fits narrow and wide mobile towers with tube dimension 50mm
- High end tarpaulins in flame resistant polyethylene according to DIN4102
- Dimension: 1.8x4m and 2.5x4m
- Extremely versatile, fast and easy to assemble without any tools
- Made in The Netherlands
